

KEY DATA

ANTI-PERSONNEL (AP) MINE CONTAMINATION: UNKNOWN

AP MINE CLEARANCE IN 2021
UNKNOWN

AP MINES DESTROYED IN 2021
UNKNOWN

LAND RELEASE OUTPUT

RECOMMENDATIONS FOR ACTION

- Pakistan should accede to the Anti-Personnel Mine Ban Convention (APMBC) as a matter of priority.
- Pakistan should clear anti-personnel mines in areas under its jurisdiction or control as soon as possible, consonant with its obligations under international human rights law.
- Pakistan should report publicly on the extent and location of anti-personnel mines and prepare a plan for their clearance and destruction.

DEMINING CAPACITY

MANAGEMENT CAPACITY

- No national mine action authority or centre

NATIONAL OPERATORS

- Pakistani military engineering units
- Frontier Constabulary
- Police bomb disposal squad

INTERNATIONAL OPERATORS

- None

OTHER ACTORS

- None

UNDERSTANDING OF AP MINE CONTAMINATION

The extent of anti-personnel mine contamination in Pakistan is not known. Pakistan remains affected by mines and other explosive ordnance resulting from the Soviet occupation of Afghanistan (1979–89) and three wars with India, in 1947, 1965, and 1971. Pakistan has also laid anti-personnel mines in front of its defended location in Pakistan-administered Kashmir.¹ More recent contamination results from the continuing conflicts in areas bordering Afghanistan, including, in particular, the Federally Administered Tribal Areas (FATA).

¹ Recent Landmine Use by India and Pakistan, Human Rights Watch Backgrounder, May 2002, at: <http://bit.ly/3srXtQz>, p. 4.

In 2019, Pakistan reiterated past statements that the country "at present faces no problem of uncleared mines since no mines have been laid by [the] Pakistan Army after escalation of 2001–2002 on Pakistan's Eastern Border".² Previously it had elaborated that mines laid during the tensions in 2001–02 were all cleared and that no mines have since been laid.³

In 2018, Pakistan stated that non-state armed groups (NSAGs) have employed improvised explosive devices (IEDs) including mines during attacks.⁴ Pakistan again reported the use of IEDs in 2019 by NSAGs had resulted in casualties,⁵ stating also that "terrorists carried out 349 IED attacks involving use of mines as well".⁶ The use of

improvised anti-personnel mines by NSAGs continued in 2020 in Baluchistan and Khyber Pakhtunkhwa. Use is attributed to a variety of militant groups, frequently referred to as "miscreants" in local media reports, but generally accepted to be constituent groups of the Tehrik-i-Taliban in Pakistan (TTP) and Balochi insurgent groups.⁷ In fact, according to media reports across Pakistan in 2018–21, casualties were reported from mines of an improvised nature laid by NSAGs, mines laid by troops along the Line of Control (LoC) between India and Pakistan, and from mines and other explosive hazards in South Waziristan (in an area that had been cleared and declared safe by the military).⁸

PROGRAMME MANAGEMENT

Pakistan has no formal civilian mine action programme. Pakistani military engineering units have been responsible for mine clearance in conflict zones, while the Frontier Constabulary has conducted mine clearance in contaminated areas of Baluchistan, FATA, and other conflict zones in the North-West Frontier Province. According to a media report some clearance is also done by the police's bomb disposal squad.⁹

ENVIRONMENTAL POLICIES AND ACTION

It is not known how, if at all, the environment is taken into consideration during planning and tasking of survey and clearance of mines in Pakistan in order to minimise potential harm from clearance.

LAND RELEASE OUTPUTS AND PROGRESS TOWARDS COMPLETION

Pakistan has not submitted an Article 13 report under Amended Protocol II of the Convention on Certain Conventional Weapons (CCW), since 2020. Mine Action Review is not aware of formal survey or clearance of mined area in 2021 in Pakistan. No target date has been set for the completion of mine clearance.

According to a media report, on 15 December 2018 an unnamed senior security official said that 22 demining teams were being formed by the Pakistani Army to defuse and remove IEDs and mines in the North Waziristan district of Khyber Pakhtunkhwa and in the FATA. These deminers would be in addition to the reported 43 teams already working in the seven former tribal districts.¹⁰ In September 2019, the Pakistan Army said in a press release that it had 100 teams in the field removing landmines which it claimed were planted by TTP, and that much of the area was cleared of mines.¹¹

In a statement delivered at Fourth Review Conference of the Anti-Personnel Mine Ban Convention (APMBC) in November 2019, Pakistan said that: "The use of landmines is exclusively by the military for defence purposes". Pakistan also acknowledged that although it was occurring at [a] "much lower scale now, Pakistan has itself been a victim of the use of landmines, including as IEDs by terrorists and non-state actors. Notwithstanding their use by terrorists. Pakistan security forces do not use mines for the maintenance of internal order and law enforcement in counter-terrorism operations."¹² Pakistan also stated that: "Marking,

12 Statement of Pakistan, Fourth APMBC Review Conference, Oslo, 29 November 2019.

fencing and monitoring of mined areas are common ways through which effective exclusion is accomplished by the Pakistan army.¹³

In 2019, Pakistan reported a total of 187 attacks causing casualties due to IEDs "all over the country", but did not disaggregate the type of IED or specify the proportion that were victim-activated.¹⁴

In January 2020, the media reported clearance of 26 anti-personnel mines planted by unknown groups in a rural college in Khar Tehsil of Bajaur District in Khyber Pakhtunkhwa, near the border with Afghanistan.¹⁵

In June 2021, it was reported by the media that security forces had completely cleared the Malakand and Bajaur districts of explosives, including landmines, while clearance operations in other districts of the FATA were in progress with more than 80 teams operating. Security forces had reportedly cleared 13km² in Mohmand; 8km² in Khyber; 5km² in Orakzai; 4km² in Kurram; 4km² in North Waziristan; and 15km² in South Waziristan tribal district.¹⁶
