ANTI-PERSONNEL (AP) MINE CONTAMINATION: UNKNOWN

AP MINE CLEARANCE IN 2021
UNKNOWN

AP MINES DESTROYED IN 2021
UNKNOWN

LAND RELEASE OUTPUT

RECOMMENDATIONS FOR ACTION

- Uzbekistan should accede to the Anti-Personnel Mine Ban Convention (APMBC) as a matter of priority.
- Uzbekistan should clear anti-personnel mines in areas under its jurisdiction or control as soon as possible, consonant with its obligations under international human rights law.
- Uzbekistan should detail the extent of its mine contamination and clearance operations.

DEMINING CAPACITY

MANAGEMENT CAPACITY*

- Uzbekistan has no functioning mine action programme.

NATIONAL OPERATORS

- Army Engineers

INTERNATIONAL OPERATORS

- None

OTHER ACTORS*

- None

* This is based on information from earlier years. It is not known if the information remains accurate.

UNDERSTANDING OF AP MINE CONTAMINATION

Uzbek forces have laid mines along Uzbekistan's international borders at various times, including on its border with Afghanistan in 1998, with Kyrgyzstan in 1999, and with Tajikistan in 2000. While Tajikistan and Uzbekistan settled most of their 1,283km-long border dispute following the collapse of the Soviet Union, certain areas have not yet been delineated and therefore the exact location of mined areas is not known.¹ In 2010, the Secretary-General of the United Nations (UN), Ban Ki-moon, criticised as "unacceptable" Uzbekistan's emplacing of mines along parts of its border that have not been delineated.²

2 "Ban calls Uzbekistan land mines 'unacceptable'", *The Hindu*, 6 April 2010, at: <http://bit.ly/2Z3WYgN>.

Soviet troops also laid mines on the Uzbek-Afghan border. Uzbekistan had reportedly cleared 95% of the minefields along the Tajik border by the end of 2007 in demining operations conducted by Uzbek army deminers in cooperation with Tajik border troops.³ The clearance, however, has not been verified by independent organisations, and, as at 2018, civilian casualties were still being reported on the Uzbek-Tajik border.⁴

In 2018, Uzbekistan and Tajikistan agreed to set up a joint commission to investigate mined areas along the Uzbek-Tajik border.⁵ As at June 2022, Uzbekistan had not made any information on progress public. Tajikistan also had still to report on any follow-up action but reiterated that it "will continue to provide updates on the development of cooperation with regard to land release along the Tajik-Uzbek border in Article 7 reports and to the Meetings of the States Parties".⁶

The first State visit of the President of Uzbekistan to Tajikistan in March 2018 saw several agreements signed between the two countries, including one on demarcation of the separate regions of the Tajik-Uzbek border. According to online media, during the visit the leaders of the two States agreed that their common border would be cleared of landmines by the end of 2019.⁷ Online media sources reported that by October 2018 demining along the border had started,⁸ and that the Tajikistan National Mine Action Centre (TNMAC) and the Tajik Ministry of Defence (MoD) "got acquainted" with mine maps before starting clearance. The size of the mined areas was not publicly shared, but unofficial reports indicated it was 9.5km².⁹ Mine clearance along the border, conducted by Uzbekistan, was reportedly completed by January 2020,¹⁰ following which the Uzbek and Tajik authorities progressed from delimiting their border to demarcating it.¹¹

Online sources from 2021 indicated that a "joint Tajik-Uzbek commission for delimitation and demarcation of the mutual border" was still active and that working groups met in August 2021 in Dushanbe and in the Uzbek city of Namangan in November 2021,¹² following discussions in May of the same year.¹³ Mine Action Review has not been able to source further information about any progress made by this joint commission.

In 2005, media reports cited Kyrgyz officials in Batken province as saying Kyrgyz border guards had checked previously mined areas of the border around the settlements of Ak-Turpak, Chonkara, and Otukchu, which had been cleared by Uzbek deminers, and confirmed that they were free of contamination.¹⁴ In March 2021, the prime ministers of Kyrgyzstan and Uzbekistan reached an agreement to end all territorial disputes between the two countries. The agreement entails land swaps and facilitation of movement between the two countries. According to online media reports, the Kyrgyz head of security services, Kamchybek Tashiyev, announced that "issues around the Kyrgyz-Uzbek border have been resolved 100 percent" and that "there is not a single patch of disputed territory left".¹⁵ However, other sources suggested that, in April 2021, just a month later, Mr Tashiyev had told residents of some disputed areas in Kyrgyzstan's southern provinces that the agreement was "not completely a done deal".¹⁶ It has also been reported that the agreement was not ratified after Kyrgyz citizens voiced dissatisfaction over terms concerning use of a reservoir.¹⁷

Uzbekistan has not reported plans to clear mines laid on its 150km border with Afghanistan.

PROGRAMME MANAGEMENT

There is no functioning mine action programme in Uzbekistan.

In March 2021, Russia and Uzbekistan were reportedly considering bilateral cooperation in mine action clearance and training of Uzbek military personnel at the Russian Mine Action Centre.¹⁸

The Commonwealth of Independent States (CIS), of which Uzbekistan is a member, reported that on 24 June 2022, following a meeting of the Council of Defence Ministers of the CIS countries, that Russian Defence Minister, Sergei Shoigu, had said that a joint unit of humanitarian demining would be created in the CIS. No timeline for this was given.¹⁹ Uzbekistan have not shared any information on this with Mine Action Review and it is not known if Uzbekistan have been involved in these discussions.

ENVIRONMENTAL POLICIES AND ACTION

It is not known how, if at all, the environment is taken into consideration during planning and tasking of survey and clearance of mines in Uzbekistan in order to minimise potential harm from clearance.

LAND RELEASE OUTPUTS AND PROGRESS TOWARDS COMPLETION

There are no detailed reports of survey or clearance output in 2021. According to online media sources in January 2020, mine clearance on the Uzbek side of the border with Tajikistan was completed.²⁰ Mine clearance was said to have been carried out exclusively by Uzbekistan and assistance from Tajikistan was refused, as the clearance conducted was exclusively on Uzbek territory.²¹
